Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: In line 30 of the claim there is a lack of antecedent basis for "the axially spaced-apart relative location". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 01011701 to Suganuma.

Suganuma discloses the method of making a holder for a rotatable tool comprising having a longitudinal axis and providing a collet (24) with split fingers movably radially to the axis, placing a cylindrical sleeve (23) telescopically over the collet and having the sleeve slidable along the collet in the two axial directions along the axis after placing a detent (23P) and spring (5) between the collet and spring. Suganuma discloses providing mutually engagable chamfers on the collet and the sleeve and engaging the chamfers with each other and thereby move the collet fingers radially inwardly to a position within the sleeve (see abstract and fig 2).

Suganuma discloses the improvement comprising the collet fingers and sleeve each presenting a circular chamfer portion and with the chamfer portion on the collet fingers being of a diameter larger than the diameter of the chamfer portion of the sleeve when the collet is free of the sleeve, whereby sliding the sleeve over the collet interengages the chamfer portions and flexes the collet fingers radially toward the axis for telescoping the collet within the sleeve (see abstract and figure 2).

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-6 are allowed over the prior art of record. Claim 1 would be allowable if rewritten to overcome the objection above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and was not used to reject any claims in this office action.
